V-Bank AG

New Issuer

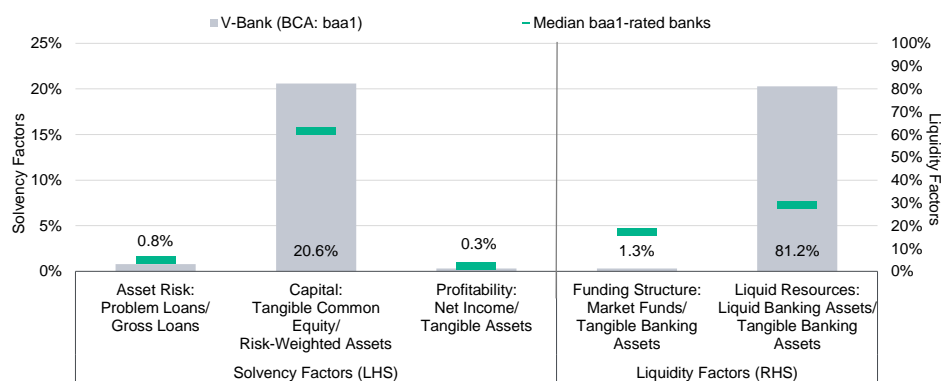

Summary

We assign A2/P-1 deposit and A3/P-2 issuer ratings to [V-Bank AG](#), as well as a baa1 Baseline Credit Assessment (BCA) and Adjusted BCA. V-Bank's deposit and issuer ratings reflect the bank's baa1 BCA and Adjusted BCA; the application of our Advanced Loss Given Failure (LGF) analysis, which takes into account the severity of loss in resolution and results in two notches of rating uplift for the bank's A2 deposit rating. We do not incorporate rating uplift from government support uplift because of its small size in the context of the German banking system.

As a specialist custodian and service provider for wealth managers in Germany, V-Bank operates an efficient and scalable digital banking platform with low credit risks and prudent asset-liability and risk management. The bank's baa1 BCA reflects its customer-driven, deposit-funded balance sheet, sizeable liquidity, and profitable growth over the last decade. V-Bank's BCA is constrained by a very high leverage of roughly 50 times (measured by total assets to common equity), its moderate ability to generate capital through earnings, and concentrated earnings sources which is reflected in a one-notch downward qualitative adjustment for business diversification.

Exhibit 1

Rating Scorecard - Key Financial Ratios

Source: Moody's Financial Metrics

Credit strengths

- » Very low credit risks, mainly related to Lombard lending
- » Sizeable liquidity, reflecting high-quality and short-duration financial assets
- » Solid funding profile, reflecting sizeable and growing deposits which are part of V-Bank's end-clients long-term investment plans

Credit challenges

- » Capital depletion as V-Bank continues to grow, reflecting limited earnings generation capacity, as well as high balance-sheet leverage which may require occasional issuance of Additional Tier 1 (AT1) capital instruments to comply with regulatory (leverage) requirements
- » Low profitability which is highly dependent on client activity and the performance of capital markets
- » Narrower business model and shorter value chain result in concentrated earnings sources

Rating outlook

- » The stable outlook reflects our expectation of broadly unchanged key financials and a stable credit profile of V-Bank over the next 12-18 month.

Factors that could lead to an upgrade

- » An upgrade of V-Bank's ratings could be triggered by an upgrade of the bank's BCA and Adjusted BCA, or by an increase in the volume of loss-absorbing liabilities.
- » An upgrade of V-Bank's BCA could be prompted by a sustained meaningful improvement of the bank's capitalization and leverage, by achieving improved profitability and earnings retention to fund its growth ambitions, as well as a broadening of its business model which leads to more diversified earnings.

Factors that could lead to a downgrade

- » A downgrade of V-Bank's ratings could result from a downgrade of the bank's BCA or from a reduction of the volume of loss-absorbing liabilities, primarily from lower AT1 instruments.
- » A downgrade of V-Bank's BCA could follow an unexpected materialisation of operational and litigation risks, or IT security issues that are severe enough to threaten the bank's reputation; an increased reliance on market funding or a material decline of liquid assets, for example because of Lombard lending growth; capital reductions or outflows that lead to a meaningfully lower capitalisation, a material, prolonged erosion of AUC or deposits, as well as end-client or financial advisor attrition, leading to a decline in underlying profitability; or acquisitions or (geographical) business expansions that are unduly aggressive from a commercial, financial or operational risk viewpoint.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody's.com> for the most updated credit rating action information and rating history.

Profile

V-Bank is a small German bank based in Munich with €4.5 billion in total assets as of 31 December 2022. V-Bank operates a focused business model of the administration and customer-driven trading of financial assets, and caters to professional financial advisors, family offices, and other semi-institutional clients. With more than €38 billion assets under custody (AUC) at the end of 2022, V-Bank has grown strongly since its foundation in 2008 to a leading independent custodian and financial services provider for professional financial advisors in Germany.

As a depository bank with around 110 employees, V-Bank operates a scaleable digital banking platform and does not provide investment advice. The relationship with the end-client, who is the ultimate owner of managed assets (AUC), is exclusively controlled by V-Bank's professional business partners (B2B4C) who hold majority stakes in the bank, including the family office of Dr. Lutz Helmig (70.5% stake) as well as a small group of professional financial advisors (11.6%). The remaining stakes are held by Wuestenrot & Wuerttembergische Group (15.3%), and management and employees (2.6%).

WEIGHTED MACRO PROFILE OF STRONG (+)

V-Bank exclusively focuses on the domestic German wealth management market, with balance sheet exposures largely arising from financial investments in European sovereign bonds and covered bonds. As a result, we assign a Strong + Macro Profile to V-Bank, in line with the Macro Profile of Germany.

Detailed credit considerations

V-Bank has low lending risks but is exposed to the typical risks applicable to custodian and wealth managers

Our assessment of V-Bank's financial profile takes into account its dedicated focus as a custodian bank which benefits from very low on-balance sheet credit and market risks. This view is reflected in our assigned a3 Asset Risk score, four notches below the bank's aa2 initial score, and reflective of non-lending credit risks inherent to the wealth management business models. V-Bank is exposed to a considerable degree of reputational, legal and operational risks that are not covered by our historical problem loan ratio. Changes in our assessment of legacy and future business-model risks will thus be captured in our Asset Risk score. Our downward adjustment also reflects interest rate risks because of the bank's ambition to increase financial security investments as a share of assets, as well as concentration risks related to a small number of professional financial advisors who account for a relative high share of AUC and deposits.

V-Bank successfully expanded its digital platform as a domestic custodian by attracting 458 independent professional investment advisors at the end of 2022, an increase of more than 55% since 2013. The number of managed accounts more than tripled over the same period to around 51,000, triggering an increase of AUC to €38.3 billion in 2022, compared with €7.6 billion in 2013.

Exhibit 3

Organic growth from new business partners were the main driver of V-Bank's rising AUC

Data in € billion

Source: Moody's Financial Metrics, company reports

V-Bank's ability to attract new business clients, including professional financial advisors, family offices, trusts, or institutional customers like corporate-sponsored pension funds or corporate treasury departments will further strengthen its franchise. As a custodian and a neutral business partner for professional financial advisors, V-Bank's success depends on maintaining cost-efficient high-quality financial services, based on a state-of-the-art digital infrastructure, while meeting its business- and end-clients needs, including tax reporting or the ability to trade digital assets. In Germany, V-Bank predominately competes with large commercial and private banks, who operate a custodian business in addition to their proprietary asset management, brokerage or private banking. V-Bank's group of professional financial advisors compete with the private banking and wealth management business of large commercial banks, private banks as well as savings and cooperative banks.

V-Bank's limited direct credit risks arise from €351 million of gross customer loans as of end-2022, comprising around 98% of highly collateralised Lombard loans and the remainder reflecting unsettled fee claims. We expect the volume of impaired loans to continue to fluctuate around historically very low levels, while the cost of credit risk will remain negligible. On balance-sheet market risks at V-Bank remain low and mainly relate to fair value changes of the bank's €999 million own investments (Depot-A, which primarily consist of covered bonds; 2021: €314 million), as well as its €239 million investment portfolio (2021: €56 million). Cash positions increased to €2.8 billion at the end of 2022 from €2.1 billion in 2021 but dropped as a percentage of asset to 62% (2021: 71%), reflecting V-Bank's treasury strategy to increase financial securities and lower cash, in order to benefit from higher interest rates.

Exhibit 4

V-Bank operates with sizeable liquidity ... Data in % of assets

Source: Moody's Investors Service, company reports

Exhibit 5

... including high-quality, short-duration financial securities Data in % of financial securities

Source: Moody's Investors Service, company reports

Our Asset Risk assessment for V-Bank includes negative adjustments for moderate concentrations from the bank's largest financial advisors which can result in material unexpected outflows of deposits and AUC, as well as elevated interest rates risks which can challenge the bank's solvency under stressed conditions. Because V-Bank aims to hold financial securities until maturity, it applies accrual accounting. At the end of 2022, the fair value of these assets was around €30 million lower than book value, equivalent to around 29% of equity.

V-Bank's strong growth and limited earnings retention capacity requires occasional fresh capital to meet regulatory requirements and address high balance sheet leverage

We assign a baa1 Capital score to V-Bank, six notches below the aa1 initial score. Our sizable negative adjustment reflects the bank's limited ability to retain earnings, and our expectation of declining solvency ratios resulting from rising risk-weighted assets (RWA) as V-Bank continues to grow and further shifts assets from cash to financial security investments. Our assessment also balances the bank's strong regulatory capital ratios with the risks to its capital because of a weak absolute level and, therefore, a high leverage in relation to its balance sheet. Our capital assessment for V-Bank also considers the bank's proven access to capital and high share of liquid resources which mitigate the risks to the bank's solvency.

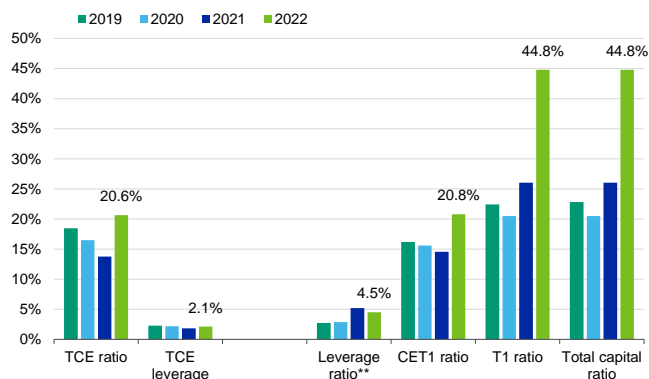

In 2022, V-Bank's equity increased to €106 million from €63 million the year before, reflecting a €32 million capital increase and €8 million retained earnings after dividends. In additions, V-Bank's owners subscribed net €65 million low-trigger Additional Tier 1 capital notes during 2022. The equity capital increase helped to improve the bank's TCE ratio to 20.6%, compared with 13.8% in 2021, balancing higher risk-weighted assets of €457 million, up around 17% from €392 million in 2021, reflecting very strong assets growth of around 50% to €4.5 billion at the end of 2022. During 1Q23, V-Bank's continued asset mix shift triggered a decrease of its TCE ratio to 15.9%, because RWA further increased to €594 million at the end of March 2023.

Our TCE capital ratio is broadly similar to V-Bank's Common Equity Tier 1 (CET1) ratio of 20.8% at the end of 2022 (2021: 14.6%). Including €110 million AT1 instruments, V-Bank's total capital ratio improved to 44.8% in 2022 (2021: 26.0%). We believe V-Bank's regulatory capital ratios benefit from an overall low risk density of 10% at the end of 2022 (1Q23: 14%), which compares total RWAs as percent of assets. V-Bank calculates RWA under the standardized approach.

Despite the recent equity increase, however, V-Bank's Tier 1 leverage ratio declined to 4.5% in 2022, from 5.2% in 2021 which benefited from the temporary exemption of cash held at central banks. In contrast, our TCE leverage ratio which compares TCE to tangible banking assets remains very low despite a slight improvement to 2.1%, from 1.8% in 2021.

Exhibit 6

V-Bank's capital ratios, grouped by Moody's versus regulatory view Data in percent of risk-weighted assets*

Note: TCE = Tangible Common Equity; CET1 = Common Equity Tier 1 capital; *The TCE leverage ratio compares TCE to tangible banking assets.

Source: Moody's Investors Service, company reports

Exhibit 7

V-Bank comfortably exceeds its regulatory minimum requirements Data in percent of risk-weighted assets**

Note: **The regulatory leverage ratio compares Tier 1 capital to exposure at default; P2R = Pillar 2 Requirement; CCoB = Capital Conservation Buffer; CCyB = Countercyclical Buffer.

Source: Moody's Investors Service, company reports

V-Bank operates with ample buffers over regulatory minimum capital requirements. At the end of 2022, the bank's excess capital above its 8.5% Pillar 2 CET1 requirement was 1,227 basis points (bps), and 3,431 bps above its 10.5% Pillar 2 minimum Tier 1 requirement. The introduction of Germany's countercyclical capital buffer (CCyB) requirement of 0.75% of domestic risk-weighted assets, effective 1 February 2023, triggered an increase in V-Bank's Pillar 2 CET1 requirements to 9.0%. In contrast, the bank's buffer above its 3.0% minimum regulatory leverage ratio is much tighter, at 4.5% at the end of 2022, reflecting €110 million issued AT1 instruments (2021: €45 million).

We expect that V-Bank will continue operating with a CET1 capital ratio of more than 14.0% and have significant capital headroom over going concern its Pillar 2 requirement, which stood at 1,227 bps at the end of 2022, up from 599 bps in 2021. The improved buffer largely reflects the bank's capital increase. We estimate that Germany's implementation of a 0.75% countercyclical capital buffer (CCyB) requirement for domestic RWA, effective 1 February 2023, will only moderately increase the bank's CET1 Pillar 2 capital requirement by around 50 bps, compared with 8.5% at the end of 2022.

Moderate profitability which is dependent on client activity and the performance of capital markets

V-Bank's assigned ba1 Profitability score is one notch above its initial score. The positive adjustment reflects our expectation that the bank will be able to improve its return on assets to around 40 bps. Our profitability assessment for V-Bank also captures the bank's high dependence on capital market developments and client-driven fee income, which can result in earnings volatility, reflecting client behavioral changes in times of economic uncertainties.

V-Bank's revenue is predominantly driven by net fee and commission income derived from the level of AUC managed and customers' trading activity, accounting for 87% of the bank's total revenue last year, up from 86% and 84% in 2021 and 2020, and on average 78% for the years 2017-19. In 2022, the bank's customer base grew 29% to around 51,000, and the AUC increased by 4% to €38.3 billion. Further, last year's heightened market volatility in combination with moderate pricing adjustments helped to improve V-Bank's margin, which compares net fee and commission income to AUC, to 12 bps in 2022, compared with 10bps in 2021. For 2023 and beyond, we expect that V-Bank's profitability will improve, reflecting the normalization of interest rates, and, hence, the higher contribution from interest income earned on high-quality, short-duration financial securities. We believe this will increase the bank's net income compared with total assets to around 40 bps, compared with around 27bps in 2022.

V-Bank's operational efficiency faces rising expenses from higher personnel and general costs originating from ongoing growth investments. However, because of its scalable business model and digital platform, the bank will benefit from economies of scale, leading to improving operating efficiency. We expect that V-Bank's cost-to-income ratio will improve to around 50%, compared with 69% in 2022 and around 72% for the years 2021 and 2020.

For 2022, V-Bank reported net income after taxes of €8.7 million, up 30% from the prior year. The increase reflects higher revenues of €53 million, up 32.5% year-on-year, driven by a 35% increase in fee and commission income to €46 million (2021: €34 million) and slightly higher net interest income of €6 million (2021: around €5 million). Operating expenses, including depreciation and amortization, grew by around 27% to €37 million in 2022, compared to €29 million in the prior year, following recruitment and investments in IT infrastructure and product offerings. Last year, V-Bank book credit provisions for Lombard loans of €0.4 million (2021: zero), resulting in a reported pretax profit of €18 million, compared with €11 million in 2021.

Exhibit 8

V-Bank's improving pretax profit reflects higher net fee and commission income because of higher AUC and client trading activity

Data in € million

Note: *Operating expenses include personnel expenses, administrative expenses, including bank levies and deposit insurance fees, and depreciation and amortization.

Source: Moody's Investors Service, company reports

Very solid funding profile reflecting granular and largely guaranteed retail deposits which limit V-Bank's reliance on wholesale market funding

V-Bank's very low market funding dependence is reflected in our assigned a3 score for Market Funding, five notches below the aa1 initial score. The assigned score strongly underpins the bank's overall baa1 financial profile and incorporates our assessment that the bank's granular retail deposits are associated with the level of AUC, reflecting the end-clients investment risk appetite and thus less sensitive to the interest rate earned on it. Our favorable assessment is mitigated by moderate concentration risks because a small number of financial advisors account for a double-digit share of AUC and all financial advisors ultimately control the end-client relationship, which can result in unexpected sizeable deposit outflow.

In 2022, V-Bank's very low Market Funds ratio remained broadly unchanged at 1.3%, compared with 1.7% in 2021. Despite V-Bank's strong balance sheet growth to €4.5 billion at the end of 2022 from €1.9 billion in 2018, the bank's market funding dependence remained very low, at around 1.1% on average. This exclusively reflects liabilities to banks, at €58 million at the end of 2022. Over the same period, V-Bank's deposits increased to €4.2 billion from €1.8bn, leaving its deposits as percent of total liabilities broadly unchanged at around 93% at the end of 2022. Around 90% of the bank's deposits are guaranteed by Germany's Deposit Protection Fund of the Association of German Banks (Entschädigungseinrichtung deutscher Banken GmbH), reflecting an average size per customer of around €80,000, and are mostly denominated in euro.

As V-Bank continues to grow, we expect that the Munich-based bank will be able to benefit from an unchanged very high share of retail deposits which can, however, somewhat fluctuate depending on the end-clients investment risk appetite, requiring careful monitoring for the bank's liquidity management. Since 2019, V-Bank's deposits ranged between 8-11% of AUC.

Over time, we expect V-Bank's gross loan-to-deposit ratio to remain unchanged, reflecting unchanged customer risk appetite to leverage its investments. At the end of 2022, €344 million or around of 8% of the bank's assets or deposits reflected Lombard lending, a ratio which again remains unchanged since 2018.

Exhibit 9

V-Bank benefits from very sizeable and granular deposits which are less sensitive to the interest earned but rather reflect the end-clients investment risk appetite

Liabilities as percent of tangible banking assets

Note: *Market Funds Ratio = Market funds/tangible banking assets.

Source: Moody's Investors Service, company reports

V-Bank has issued AT1 instruments to comply with regulatory leverage requirements as its balance sheet is growing. At the end of 2022, the issued nominal volume for these instruments which are designated to bear losses in case of resolution or bankruptcy, had increased to €110 million, or 2.5% of tangible banking assets, up from €45 million in 2021 and €15 million in 2020. In 2022, V-Bank issued to its owners and other professional financial advisors €70 million new instruments with a 5.125% low-trigger CET1 ratio and first call date on 30 September 2027. From the remaining €40 million AT1 instruments, €10 million can be called first on 30 September 2025 and €30 million can be called first a year later on 30 September 2026; all these instruments come with a 7.0% high-trigger CET1 ratio.

Moderate liquidity supported by the ECB's refinancing programs and mitigated by asset encumbrance

We assign an a1 Liquid resources score to V-Bank, three notches below the aa1 initial score. Our assessment reflects V-Bank's deposit-driven balance sheet and very low customer loans which result in very high cash and central bank balances, as well as sizeable financial securities. Our adjustment also takes into account a moderate decline in the bank's Liquid resources, because a small share of the bank's intended asset mix change is invested into corporate/financial bonds/funds to benefit from higher coupons. We consider these financial securities less liquid than highly-rated governments or comparable financial securities and thus exclude them from our Liquid Resources ratio.

As a custodian bank, V-Bank's liquid resources are higher than for commercial banks and or Swiss wealth managers. This reflects the absence of commercial loans and a relatively low share of security lending (Lombard loans), accounting for only 8% of assets.

Our Liquid Banking Asset ratio of 81.2% at the end of 2022 considers V-Bank's €2.8 billion in cash and central bank money, €104 million loans to banks, and €999 million high-quality, short-duration financial securities, of which around 68% are repoable with the German Bundesbank. We expect that the bank's LBA ratio remains above 70% as it increases the share of financial security investments, including corporate and financial institution bonds with at least A ratings.

We expect that V-Bank will carefully manage its liquid resources, including ample minimum cash positions held at the German Bundesbank. V-Bank's concentration risks to a small number of financial advisors who manage the end-client relationship, creates liquidity risk which can result in sudden, unexpected large deposit outflows. Our favorable view of V-Bank's liquidity is also underpinned by its high regulatory liquidity coverage ratios (LCR) of 218% at the end of 2022, which slightly decreased from 236% on average during the four quarters of the year 2021 (2020: 221%).

Exhibit 10

V-Bank's very high liquidity reflects its business model as custodian and the absence of commercial lending with the exception of small security lending activities

Assets as percent of tangible banking assets

Note: *Liquid Banking Asset Ratio = Liquid assets/tangible banking assets.
 Source: Moody's Investors Service, company reports

Qualitative adjustment captures narrow business model

We reduce V-Bank's weighted average outcome of assigned Financial Profile factor scores by one notch to reflect the bank's narrower business model and shorter value chain than a bank that fully owns its distribution franchise to the end customer and produces additional revenue-generating products in house. As one of the larger specialist custodians in Germany, V-Bank is exposed to market-driven fluctuations in assets under custody (AUC) which can result in earnings volatility, and at the same time, it naturally limits the potential for (earnings) diversification. Because of this, we consider V-Bank to operate more of a monoline business model, with concentrated earnings sources which is reflected in a one-notch downward qualitative adjustment for business diversification in the standalone assessment.

Business diversification is an important gauge of a bank's sensitivity to stress in a single business line. It is related to earnings stability in the sense that earnings diversification across distinct and relatively uncorrelated lines of business increases the reliability of a bank's earnings streams and its potential to absorb shocks affecting a business line.

ESG considerations

V-Bank AG's ESG Credit Impact Score is CIS-3

Exhibit 11

ESG Credit Impact Score

CIS-3

Moderately Negative

For an issuer scored CIS-3 (Moderately Negative), its ESG attributes are overall considered as having a limited impact on the current rating, with greater potential for future negative impact over time. The negative influence of the overall ESG attributes on the rating is more pronounced compared to an issuer scored CIS-2.

Source: Moody's Investors Service

V-Bank's **CIS-3** indicates limited impact of ESG considerations on the ratings to date with potential for greater negative impact over time, mainly due to moderate governance risks. Environmental and social factors have a limited impact on the ratings to date.

Exhibit 12

ESG Issuer Profile Scores

Source: Moody's Investors Service

Environmental

V-Bank faces low environmental risks. In line with most depository institutions and wealth managers, V-Bank has low exposure to carbon transition risk from Lombard lending and its financial securities exposures are well diversified. In response to developing customer focus on environmental stewardship and wider ESG considerations, the bank increasingly takes steps to align its customer services with the transition to a low-carbon economy.

Social

V-Bank faces moderate social risks related to regulatory and litigation risks, requiring the bank to meet high compliance standards. In line with most depository institutions and wealth managers, V-Bank's exposure to customer relations risks is mitigated by the bank's developed policies and procedures, supported by its client mix being geared towards more professional clients. High data security and customer privacy risks are also mitigated by technology solutions and organizational measures to prevent data breaches. Social risks related to demographic trends are partly mitigated by the bank's focus on wealth management services, including services for the transfer of wealth to the next generation.

Governance

V-Bank faces moderate governance risks and reflect the bank's very ambitious growth plans, which may continue to require external capital support in the absence of sufficient internal profit generation. V-Bank demonstrates sound governance through an independent board along with prudent financial policies, risk management and compliance functions, additionally proven by management's track record. V-Bank is majority owned by a family which holds a controlling stake. This results in governance risk related to concentrated ownership and potential outsized influence of the family on executive board members which is mitigated by the presence of independent directors and Germany's developed institutional framework. Financial disclosures are less comprehensive relative to peers and industry best practice.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moodys.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Support and structural considerations**Affiliate support is low**

We assume a low probability that V-Bank's owners would support the bank in resolution or liquidation, which results in no rating uplift from affiliate support for V-Bank's ratings.

Loss Given Failure analysis

V-Bank is subject to the European Union's Bank Recovery and Resolution Directive (BRRD), which we consider an operational resolution regime. Therefore, we apply our Advanced LGF analysis, where we consider the risks faced by the different debt and deposit classes across the liability structure should the bank enter resolution.

In our Advanced LGF analysis we consider not only the results of both the formal legal position (*pari passu*, or '*de jure*' scenario), to which we assign a 75% probability, but also an alternative liability ranking, reflecting resolution authority discretion to prefer deposits over senior unsecured debt (full depositor preference, or '*de facto*' scenario), to which we assign a 25% probability.

We assume a residual tangible common equity of 2.1% at the end of 2022, as well as asset losses of 8% of tangible banking assets in a failure scenario. We also assume a 25% runoff of junior wholesale deposits and a 5% runoff of preferred deposits. These ratios are in line with our standard assumptions. In addition, we apply a standard assumption for European banks that 26% of deposits are junior.

For V-Bank's deposit ratings (local and foreign currency), rated A2, Moody's Advanced LGF analysis indicates a very low loss given failure, leading to two notches of rating uplift from its baa1 Adjusted BCA.

For V-Bank's issuer ratings (local and foreign currency), rated A3, Moody's Advanced LGF analysis indicates a low loss given failure, leading to one notch of rating uplift from its baa1 Adjusted BCA.

Government support considerations

Because of its small size relative to the German banking system and its limited degree of interconnectedness, we assigned a low government support probability assumption to V-Bank, which does not result in any rating uplift for the bank's deposits and issuer ratings.

Counterparty Risk Ratings (CRRs)

V-BANK'S CRRs are A1/P-1

The A1 CRRs are three notches above V-Bank's baa1 Adjusted BCA, based on the extremely low loss given failure from the volume of instruments, primarily junior deposits and AT1 instruments, that are subordinated to CRR liabilities. V-Bank's CRRs do not benefit from government support, in line with our support assumptions on deposits.

Counterparty Risk (CR) Assessment

V-BANK'S CR Assessment is A1(CR)/P-1(CR)

V-Bank's A1(cr) CR Assessment is three notches above the baa1 Adjusted BCA, based on the buffer against default provided to the senior obligations represented by the CR Assessment by more subordinated instruments, primarily junior deposits and AT1 instruments. Because the CR Assessment captures the probability of default on certain senior operational obligations, rather than expected loss, we focus purely on subordination and takes no account of the volume of the instrument class. V-Bank's CR Assessment does not benefit from government support, in line with our support assumptions on deposits.

Rating methodology and scorecard factors

Methodology

The principal methodology used in these ratings was Banks Methodology published in July 2021 and available at <https://ratings.moodys.com/api/rmc-documents/71997>.

ESG Considerations

Moody's general principles for assessing environmental, social and governance (ESG) risks in our credit analysis can be found at <https://ratings.moodys.com/rmc-documents/74785>

About Moody's Bank Scorecard

Our Bank Scorecard is designed to capture, express and explain in summary form our Rating Committee's judgment. When read in conjunction with our research, a fulsome presentation of our judgment is expressed. As a result, the output of our scorecard may materially differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

CREDIT RATINGS ISSUED BY MOODY'S CREDIT RATINGS AFFILIATES ARE THEIR CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES, AND MATERIALS, PRODUCTS, SERVICES AND INFORMATION PUBLISHED BY MOODY'S (COLLECTIVELY, "PUBLICATIONS") MAY INCLUDE SUCH CURRENT OPINIONS. MOODY'S DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE APPLICABLE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S CREDIT RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS, NON-CREDIT ASSESSMENTS ("ASSESSMENTS"), AND OTHER OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. AND/OR ITS AFFILIATES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the credit rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody's.com under the heading "Investor Relations — Corporate Governance — Charter Documents - Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
